- Ford Otosan, is **Turkey's top exporter for 6 and Turkey automotive industry top exporter for 10 consecutive years.**
- Ford Otosan announced the **€2 Billion (TL 20.5 billion) investment plan**, for the **next-generation electric and connected commercial vehicle projects** in Kocaeli Plants with its mission to lead the electric transformation of the automotive industry in March, 2021
 - With the investment that will take place in 6 years and the impact of which will spread over 10 years, Ford Otosan's annual vehicle capacity will increase to **650 thousand units.**
 - **The battery assembly capacity of Turkey's first and only integrated electric vehicle production facility** is 130 thousand units.
 - Starting the first half of 2023, Ford Otosan will manufacture the **diesel, plug-in hybrid electric (PHEV)**, and all-electric variants of Ford's '**Next-Generation Transit Custom Family**'. As part of the **Ford-Volkswagen strategic alliance**, Volkswagen's next-generation 1-tonne commercial vehicle will also be produced in Kocaeli by Ford Otosan.
 - With the investment, 3000 people directly, 15000 people indirectly -including our suppliers- a total of 18 thousand additional jobs will be provided.
- Today, Ford Otosan produces 74% of Commercial Vehicles sold in Europe and 87% of the Transit product line sold across Europe by Ford, last year marking the seventh consecutive year in European commercial market leadership.
- At Ford Otosan, we are a strategic partner of Ford of Europe to grow its commercial vehicle business, along with continued positive impact of the increase in e-commerce, Ford's strong market position and alliance with VW on 1 tonne commercial vehicle production.

- All these achievements were crowned with another success as with the production of E-Transit, Ford's first all-electric van, for the European market. Ford Otosan aims to bring the first all-electric Ford E-Transit together with its customers in Turkey in parallel with Europe in 2022.
- With the aspiration to become the first automotive company in Turkey to produce electric commercial vehicles including batteries, Ford Otosan initiated its new battery assembly line investment in 2020.
- In 2018, Ford Otosan recognized globally with the smart factory activities at its Kocaeli Plant and became the first factory from Turkey to be added to the **World Economic Forum's (WEF) "Global Lighthouse Network"**, which selected only 16 plants worldwide. The plant is also the first Ford factory to join the prestigious network.
